ACTIVITY 1: CELEBRITY ADDRESSES

New Skills Reinforced:

In this activity, you will practice how to:

1. create a database.
2. name and save a database.
3. create a table.
4. define a database table structure.
5. save a table.
6. adjust column widths.
7. change the page setup to landscape.
8. print a table.

Activity Overview:

For many people, writing to famous people is a hobby. Fans hope to get responses to their letters. *Fanmail.biz* is a Web site that holds more than 50,000 celebrity addresses. The site includes addresses for actors, actresses, singers, dancers, models, authors, and sports figures. People who have successfully used the address on the site to write to and have received a response from a celebrity also give information on the response time.

The following activity illustrates how a database can be used to organize an address book of various celebrities.

Instructions:

- NEW SKILL** 1. Create a NEW database.
- NEW SKILL** 2. Name the database ADDRESSES.
- NEW SKILL** 3. Create a NEW table in Design View.
- NEW SKILL** 4. Set up the database table by using the database structure provided below.

Database Structure:

Field Name	Data Type
First Name	Text
Last Name	Text
Management Company	Text
Street Address	Text
City	Text
State	Text
Zip	Text

- NEW SKILL** 5. Save the table as CELEBRITY without defining a primary key.
6. Go to Datasheet View and enter the data for each record as shown.
- NEW SKILL** 7. Adjust the Field Name column widths as necessary.
8. Resave the table.
9. Carefully proofread your work for accuracy.
- NEW SKILL** 10. Change the page setup to landscape orientation.
- NEW SKILL** 11. Print a copy of the CELEBRITY table if required by your instructor.

ACTIVITY 1: CELEBRITY ADDRESSES DATA TO INPUT

Record # 1

First Name	Hilary
Last Name	Duff
Management Company	Boo Management
Street Address	10061 Riverside Drive, Suite 868
City	Toluca Lake
State	CA
Zip	91602

Record # 6

First Name	Aaron
Last Name	Carter
Management Company	Management 101
Street Address	1680 North Vine Street, Suite 716
City	Hollywood
State	CA
Zip	90028

Record # 2

First Name	Justin
Last Name	Timberlake
Management Company	The Firm
Street Address	9465 Wilshire Blvd., 6th Floor
City	Beverly Hills
State	CA
Zip	90212

Record # 7

First Name	Cameron
Last Name	Diaz
Management Company	The Firm
Street Address	9465 Wilshire Blvd., 6th Floor
City	Beverly Hills
State	CA
Zip	90212

Record # 3

First Name	Beyonce
Last Name	Knowles
Management Company	Music World Entertainment
Street Address	1505 Hadley Street
City	Houston
State	TX
Zip	77002

Record # 8

First Name	Channing
Last Name	Tatum
Management Company	Management 360
Street Address	9111 Wilshire Blvd.
City	Beverly Hills
State	CA
Zip	90210

Record # 4

First Name	Nick
Last Name	Lachey
Management Company	Little Nicky Inc.
Street Address	2850 Ocean Park Blvd.
City	Santa Monica
State	CA
Zip	90411

Record # 9

First Name	Kate
Last Name	Bosworth
Management Company	One Entertainment
Street Address	9220 Sunset Blvd., Suite 306
City	Los Angeles
State	CA
Zip	90069

Record # 5

First Name	Mary Kate
Last Name	Olsen
Management Company	Dualstar Entertainment Group
Street Address	3760 Robertson Blvd.
City	Culver City
State	CA
Zip	90232

Record # 10

First Name	Wilmer
Last Name	Valderrama
Management Company	United Talent Agency
Street Address	9560 Wilshire Blvd., 5th Floor
City	Beverly Hills
State	CA
Zip	90212

ACTIVITY 2: RAP ALBUMS

New Skills Reinforced:

In this activity, you will practice how to:

1. format a number field.
2. sort in ascending order.

Activity Overview:

Billboard.biz tracks almost any musical chart one can imagine. Album sales are listed weekly and yearly for all genres. This site allows people from within the music industry and those who are just music fans to track an artist's or album's progress daily. The following is a list of the top rap albums for the year ending 2006.

The following activity illustrates how a database can be used to hold the top rap albums of the year and how to sort the albums by artist.

Instructions:

1. Create a NEW database.
2. Name the database ALBUMS.
3. Create a NEW table in Design View.
4. Set up the database table by using the database structure provided below.

Database Structure:

Field Name	Data Type
Rank	Number
Album Title	Text
Artist	Text

NEW SKILL

5. Save the table as RAP ALBUMS without defining a primary key.
6. Go to Datasheet View and enter the data for each record as shown.
7. Adjust the Field Name column widths as necessary.
8. Sort the Artist field in ascending order (A to Z).
9. Resave the table.
10. Carefully proofread your work for accuracy.
11. Print a copy of the RAP ALBUMS table if required by your instructor.

NEW SKILL

ACTIVITY 2: RAP ALBUMS DATA TO INPUT

Record # 1

Rank	1
Album Title	King
Artist	T.I.

Record # 10

Rank	10
Album Title	What the Game's Been Missing!
Artist	Juelz Santana

Record # 2

Rank	2
Album Title	Tha Carter II
Artist	Lil Wayne

Record # 3

Rank	3
Album Title	Curtain Call: The Hits
Artist	Eminem

Record # 4

Rank	4
Album Title	Duets: The Final Chapter
Artist	The Notorious B.I.G.

Record # 5

Rank	5
Album Title	The Sound of Revenge
Artist	Chamillionaire

Record # 6

Rank	6
Album Title	New Joc City
Artist	Yung Joc

Record # 7

Rank	7
Album Title	Port of Miami
Artist	Rick Ross

Record # 8

Rank	8
Album Title	Release Therapy
Artist	Ludacris

Record # 9

Rank	9
Album Title	Get Rich or Die Tryin'
Artist	Soundtrack

ACTIVITY 3: MOVIES

New Skills Reinforced:

In this activity, you will practice how to:

1. format a currency field.
2. sort in descending order.

Activity Overview:

Movie studios eagerly anticipate the list of the top ten grossing movies each year. Many new movie budgets are determined by how successful past movies have been. The following information on the top ten grossing movies of 2006 was found at *boxofficemojo.com*.

The following activity illustrates how a database can be used to store the top ten grossing movies of 2006 for comparison purposes.

Instructions:

1. Create a NEW database.
2. Name the database MOVIES.
3. Create a NEW table in Design View.
4. Set up the database table by using the database structure provided below.
5. Save the table as TOP TEN MOVIES without defining a primary key.
6. Go to Datasheet View and enter the data for each record as shown. (Note: It is not necessary to enter any commas or dollar signs.)

Database Structure:

Field Name	Data Type
Rank	Number
Movie Title	Text
Earnings	Currency (<i>Format for 0 Decimal Places</i>)

NEW SKILL

7. Adjust the Field Name column widths as necessary.
8. Sort the earnings field in descending order (Z to A).
9. Resave the table.
10. Carefully proofread your work for accuracy.
11. Print a copy of the TOP TEN MOVIES table if required by your instructor.

NEW SKILL

ACTIVITY 3: MOVIES DATA TO INPUT

Record # 1

Rank	10
Movie Title	Casino Royale
Earnings	138950058

Record # 2

Rank	9
Movie Title	Talladega Nights: The Ballad of Ricky Bobby
Earnings	148213377

Record # 3

Rank	8
Movie Title	Happy Feet
Earnings	151217515

Record # 4

Rank	7
Movie Title	Over the Hedge
Earnings	155019340

Record # 5

Rank	6
Movie Title	Ice Age: The Meltdown
Earnings	195330621

Record # 6

Rank	5
Movie Title	Superman Returns
Earnings	200081192

Record # 7

Rank	4
Movie Title	The DaVinci Code
Earnings	217536138

Record # 8

Rank	3
Movie Title	X-Men: The Last Stand
Earnings	234362462

Record # 9

Rank	2
Movie Title	Cars
Earnings	244082982

Record # 10

Rank	1
Movie Title	Pirates of the Caribbean: Dead Man's Chest
Earnings	423315812

ACTIVITY 4: AMERICAN IDOL®

New Skills Reinforced:

- In this activity, you will practice how to:
1. format a date field.

Activity Overview:

One TV show that appeals to all age groups is American Idol®. After holding hundreds of auditions nationwide, 24 finalists are selected each season to appear on the show to compete for the title of America's Idol and to receive a recording contract. The show is still going strong after five seasons. As America knows, Taylor Hicks was named the winner of American Idol® for season five. Here is the information for the rest of the top contestants from season five.

The following activity illustrates how a database can be used to track the length of time that contestants remain in a contest.

Instructions:

1. Create a NEW database.
2. Name the database AMERICAN IDOL.
3. Create a NEW table in Design View.
4. Set up the database table by using the database structure provided below.

Database Structure:

Field Name	Data Type
Name	Text
Age	Number
Hometown	Text
Date Voted Off	Date (Default format)

NEW SKILL

5. Save the table as AI SEASON FIVE without defining a primary key.
6. Go to Datasheet View and enter the data for each record as shown. (Note: Dates will format appropriately once data is entered.)
7. Adjust the Field Name column widths as necessary.
8. Sort the Date Voted Off field in descending order.
9. Resave the table.
10. Carefully proofread your work for accuracy.
11. Print a copy of the AI SEASON FIVE table if required by your instructor.

ACTIVITY 4: AMERICAN IDOL® DATA TO INPUT

Record # 1

Name	Ace Young
Age	25
Hometown	Denver, CO
Date Voted Off	April 19, 2006

Record # 2

Name	Bucky Covington
Age	28
Hometown	Rockingham, NC
Date Voted Off	April 12, 2006

Record # 3

Name	Chris Daughtry
Age	26
Hometown	McLeansville, NC
Date Voted Off	May 10, 2006

Record # 4

Name	Elliott Yamin
Age	27
Hometown	Richmond, VA
Date Voted Off	May 17, 2006

Record # 5

Name	Katharine McPhee
Age	21
Hometown	Los Angeles, CA
Date Voted Off	May 24, 2006

Record # 6

Name	Kellie Pickler
Age	19
Hometown	Albemarle, NC
Date Voted Off	April 26, 2006

Record # 7

Name	Kevin Covais
Age	16
Hometown	Levittown, NY
Date Voted Off	March 22, 2006

Record # 8

Name	Lisa Tucker
Age	16
Hometown	Anaheim, CA
Date Voted Off	March 29, 2006

Record # 9

Name	Mandisa
Age	29
Hometown	Antioch, TN
Date Voted Off	April 5, 2006

Record # 10

Name	Melissa McGhee
Age	21
Hometown	Tampa, FL
Date Voted Off	March 15, 2006

Record # 11

Name	Paris Bennett
Age	17
Hometown	Fayetteville, GA
Date Voted Off	May 3, 2006

ACTIVITY 5: WEATHER

New Skills Reinforced:

- In this activity, you will practice how to:
1. format a time field.

Activity Overview:

How many times have you planned a warm weather vacation only to have the weather not cooperate? If you are flexible with your vacation dates, researching the weather forecast can help you to avoid the disappointment of bad weather during your trip. Keep in mind, of course, that Mother Nature is not 100% predictable. The following information on the ten-day Los Angeles forecast was found at *weather.com*.

The following activity illustrates how a database can be used to hold information about temperatures and times of sunrise and sunset for a specific time period for vacation planning purposes.

Instructions:

1. Create a NEW database.
2. Name the database WEATHER.
3. Create a NEW table in Design View.
4. Set up the database table by using the database structure provided below.

Database Structure:

Field Name	Data Type
Date	Date/Time (<i>Format for Short Date</i>)
Forecast	Text
High Temp (F)	Number
Low Temp (F)	Number
Sunrise	Date/Time (<i>Format for Medium Time</i>)
Sunset	Date/Time (<i>Format for Medium Time</i>)

NEW SKILL

5. Save the table as TEN DAY LA FORECAST without defining a primary key.
6. Go to Datasheet View and enter the data for each record as shown.
7. Adjust the Field Name column widths as necessary.
8. Sort the High Temp (F) field in descending order.
9. Resave the table.
10. Carefully proofread your work for accuracy.
11. Print a copy of the TEN DAY LA FORECAST table if required by your instructor.

ACTIVITY 5: WEATHER DATA TO INPUT

Record # 1

Date	6/13/07
Forecast	Partly Cloudy
High Temp (F)	81
Low Temp (F)	62
Sunrise	5:41 AM
Sunset	8:05 PM

Record # 6

Date	6/18/07
Forecast	Sunny
High Temp (F)	70
Low Temp (F)	58
Sunrise	5:42 AM
Sunset	8:07 PM

Record # 2

Date	6/14/07
Forecast	Partly Cloudy
High Temp (F)	79
Low Temp (F)	61
Sunrise	5:41 AM
Sunset	8:05 PM

Record # 7

Date	6/19/07
Forecast	Sunny
High Temp (F)	72
Low Temp (F)	59
Sunrise	5:42 AM
Sunset	8:07 PM

Record # 3

Date	6/15/07
Forecast	Mostly Sunny
High Temp (F)	76
Low Temp (F)	61
Sunrise	5:41 AM
Sunset	8:06 PM

Record # 8

Date	6/20/07
Forecast	Sunny
High Temp (F)	73
Low Temp (F)	61
Sunrise	5:42 AM
Sunset	8:07 PM

Record # 4

Date	6/16/07
Forecast	Partly Cloudy
High Temp (F)	72
Low Temp (F)	59
Sunrise	5:41 AM
Sunset	8:06 PM

Record # 9

Date	6/21/07
Forecast	Sunny
High Temp (F)	74
Low Temp (F)	61
Sunrise	5:42 AM
Sunset	8:07 PM

Record # 5

Date	6/17/07
Forecast	Sunny
High Temp (F)	71
Low Temp (F)	58
Sunrise	5:41 AM
Sunset	8:06 PM

Record # 10

Date	6/22/07
Forecast	Partly Cloudy
High Temp (F)	74
Low Temp (F)	61
Sunrise	5:42 AM
Sunset	8:08 PM

ACTIVITY 6: NASCAR®

New Skills Reinforced:

In this activity, you will practice how to:

1. format a yes/no field.
2. sort by multiple fields.
3. create a query.

Activity Overview:

Racecar driving is an exciting sport to watch. It can also be fun to track the points that drivers compile as the season progresses. Drivers earn points based on their order of finish in each race. Drivers can also earn points based on how many times they hold the lead in each race. The NASCAR® Web site compiles statistics and standings from every race throughout the year. The following activity contains the 2006 Official Driver Standings according to www.nascar.com.

The following activity illustrates how to use a database to determine which drivers compiled the most points in one season of racing and how to sort by multiple fields.

Instructions:

1. Create a NEW database.
2. Name the database NASCAR.
3. Create a NEW table in Design View.
4. Set up the database table by using the database structure provided below.

Database Structure:

Field Name	Data Type
Rank	Text
First Name	Text
Last Name	Text
Points	Number
Top 10 Finishes	Number
Winnings	Currency (<i>Format for 0 Decimal Places</i>)
Rookie	Yes/No

NEW SKILL →

5. Save the table as NASCAR STANDINGS without defining a primary key.
6. Go to Datasheet View and enter the data for each record as shown.
7. Adjust the Field Name column widths as necessary.
8. Resave the table.
9. Carefully proofread your work for accuracy.
10. Print a copy of the NASCAR STANDINGS table if required by your instructor.
11. Close the NASCAR STANDINGS table.

Continued →

Activity 6: NASCAR® Continued

NEW SKILL

12. Create a NEW query in Design View that sorts the drivers first by Top 10 Finishes in descending order and then by Winnings in descending order.
13. Save the query as TOP10 WINNINGS.
14. Print the TOP 10 WINNINGS query if required by your instructor.
15. Create a NEW query in Design View that shows only the records of the drivers that are rookies.
16. Save the query as ROOKIE DRIVERS.
17. Print the ROOKIE DRIVERS query if required by your instructor.

ACTIVITY 6: NASCAR® DATA TO INPUT

Record # 1

Rank	1
